Press Release

HTRI Celebrates Grand Opening of New Multi-million Dollar Research & Technology Center

College Station, Texas, USA – November 14, 2007

Heat Transfer Research, Inc. (HTRI), the global leader in process heat transfer and heat exchanger technology, today celebrated the official grand opening of its new, multi-million dollar Research & Technology Center in Navasota, Texas. The center features a fully-enclosed 15,000 square foot research bay along with offices and training facilities.

"We are proud to be the anchor tenant in The Business and Industrial Center at Navasota," said Claudette D. Beyer, HTRI President and CEO, "and we look forward to many years of a productive partnership with the city and Grimes County as we continue our mission of providing nearly 800 companies throughout the world with heat transfer research data, software, training, and contract services."

The grand opening festivities are part of five days of meetings in The Woodlands that included the celebration of HTRI's 45th Anniversary. The events are being attended by persons from around the globe, including representatives from most of the world's largest energy and engineering companies.

About HTRI

Heat Transfer Research, Inc. (HTRI) is the global leader in process heat transfer and heat exchanger technology. Founded in 1962, our industrial research and development consortium serves the engineering needs of nearly 800 corporate member sites.

HTRI staff conduct application-oriented research on industrial-scale equipment at our state-of-the-art facility; we use these proprietary data to develop methods and software for the thermal design and analysis of heat exchangers and fired heaters. We provide technical support to all members and offer training, consulting, and contract services to both members and non-members. For more information about HTRI, visit our website at www.HTRI.net.
